Version 2.00

- Added support for Android 13.
- Application file access location in the device has been moved from external storage to /data/tmp/public.
- Saving username and password for FTP server on settings.xml is disabled.
- Added support for FTPS server uploading instead of FTP uploading.
- Database Enhancements:
 - Added support for product database import on “xml” format.
 - Added support for product database import on “csv” format.
- Removed Webdav server uploading support.

Version 1.43

- Existing location can be edited in settings menu.
- No incorrect pop-up for “out of memory error”, when changing language.
- “Select All” Option is available to upload all session files at once.
- Database Enhancements:
 - XML format support for importing Product Database
 - Added option to Update or Create Database
 - Added option to select the database file to import.
 - Added option to do Auto-Update on launch.
 - Every Import or Update on Database is provided with a summary upon completion on UI.

- Inventory Protection: Added alert message to prompt user to save current session if the session size exceeds set limit.
- Added option to delete old/stale files from storage (session files)
- Datawedge Enhancements:
 - Only if Datawedge profile doesn't exist the default profile is pushed to Datawedge for import.
 - Added Option to reset to default Datawedge Profile from settings menu.
 - Added option to do Secure (WebDav) vs FTP session file upload to server.

Version 1.4

- Pop-up on AssetTrackerLite Screen upon FTP upload completion/failure.

About Zebra Asset Tracker Lite

Asset Tracker Lite is an introductory asset tracking application designed for small businesses. It is a simple, license-free application for Zebra Android mobile computers and is the first step in improving asset visibility. Employees simply walk through a facility and scan the barcodes on the assets. It helps increase the value of Zebra mobile computers.

Asset tracking is fast, easy, and accurate, and so cost-effective. You can take asset inventory as often as business needs dictate.

Asset Tracker Lite improves asset visibility, ensuring that workers can locate the assets they need to get the job done. It also improves worker productivity, asset utilization, and asset value.
